Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over European Patent EP 0 362 058 B1 in view of Harrison (US 5,417,152). The European Patent discloses the claimed subject matter except for the motor having two driving speeds with a first switch and a second switch. The patent to Harrison (Fig. 11) discloses that it is known in the art to have a juicer with two driving speeds including a first switch and a second switch. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the juicer of the European Patent with two driving speeds including a first switch and a second switch in the manner suggested by Harrison in order to squeeze juice from the pulp so that a larger yield of juice can be achieved.

Allowable Subject Matter

Claims 1-4, 8-10 and 22-25 are allowable over the prior art.

Response to Arguments

Applicant's arguments filed April 11, 2005 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., structure equivalent to the switch being *operatively connected* to the rotating dome) are not recited in the rejected claim. Although the claim is interpreted in light of the specification, limitations from the specification are not read into the claim. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Furthermore, Maurin clearly discloses a first means (426) for switching the electromotor to a first rotational speed, and a second means (424) for switching the electromotor to a second rotational speed greater than the first rotational speed. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be

admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy F. Simone whose telephone number is 571-272-1407. The examiner can normally be reached on weekdays between 8:00am-5:00pm.
